

Professional Solutions Group

The Power of Collaboration. We've never met a challenge we can't solve.

You alone have the knowledge, the experience and the insight to enable your complex projects to succeed. Nothing can replace that. But in today's competitive engineering and construction marketplace, you need to ensure that all of the pieces that drive project success are in place and working together.

Envision.

Your mission critical information systems, processes, and experienced staff are some of the most vital elements of your projects. You need to be confident that they are contributing to your operational effectiveness and financial growth, not holding it back. Your ability to leverage an experienced team to help deploy smart solutions to projects on time and on budget is a key advantage to your project success.

The E&C Professional Solutions Group not only helps you with your projects' challenges, we help sustain competitive leadership. With our solid experience in the construction and engineering industry, collaborative approach and a solid track record of customer successes, we deliver custom solutions that streamline operational efficiencies and enable you to accelerate project deployment and bring greater value to your customers.

The highly-skilled people of the E&C Professional Solutions Group are committed to your success. We listen, augment your team's expertise and apply unique information technology solutions to the project goals you've set for your company. Our collaborative way of working ensures that our teams work seamlessly with yours so that the IT solutions we develop are a perfect fit for your organization.

We are proud of the work that we have done with our customers and hope to have the opportunity to work with you.

A Great Team

Perot Systems Professional Services Group's unique culture has attracted highly experienced and talented project managers, business analysts, application and web developers, application and system architects, systems integrators and database administrators. This concentration of top talent, coupled with the company's IT tools and methodology, enables us to deliver remarkable service and results.

Powerful Synergies

Our intimate knowledge of the construction and engineering marketplace enables us to develop high-impact IT and project critical solutions for our customers. To continually renew our business processes and operational capabilities in light of emerging technologies, we leverage Perot Systems' global strengths in a wide range of services and capabilities, including, information engineering, document controls/management, project controls, and environmental management. This primary emphasis on business knowledge and experience complemented with IT competence and capabilities helps our customers save money, solve complex project problems and achieve a competitive advantage.

Smart Use of IT Services and Capabilities

Our team stays abreast of industry trends and employs the latest, most viable and adaptable technologies to bring our customers the highest possible level of service. We participate in E&C technical research groups, maintain successful relationships with E&C industry providers, and continually build upon our technical expertise through ongoing software and product training.

Design.

Team Capabilities Are Key. Your Success Is Our Success.

Consulting Services

We thoroughly analyze industry and market factors and determine how any changes could affect you. We help you take advantage of trends and opportunities by aligning your IT systems, business processes and business capabilities to give your company a competitive advantage.

Software Development/ Management Services

Using multidisciplinary teams, we offer a complete array of timely, cost-effective and responsive application management and support services. We evaluate and implement commercial systems, develop custom systems, integrate them with your legacy systems, enhance existing applications with needed functionality, and help your users take full advantage of these new capabilities – all with the goal of maximizing your software investment and positioning your project for success.

Infrastructure Management Services

Using our core technical expertise and capabilities, we collaborate with you on the design, development and management of solutions that incorporate the most stringent security standards. Whether you're merging with an existing infrastructure, migrating to a newer one or building an enterprise-wide platform, we ensure the solution meets your needs and is able to sustain your long-term project success.

Focused On Your Project Goals

Technology solutions should help you reach your project goals. We view our IT and project solutions as strategic building blocks in your total business strategy.

Many companies offer business and IT solutions. What sets us apart is our domain knowledge, collaborative approach, and ability to stand behind our work to ensure customers get the most from their IT investments. We sit down with you to listen and learn about your project's distinctive challenges and opportunities. And we help you lay the foundation for a relationship built on trust and integrity.

Once we understand your goals and objectives, we apply our expertise and resources to create IT solutions specifically tailored to your company. Solutions that are not just different, but truly functional and productive. Solutions that are flexible and adaptable, allowing for timely enhancements. And most importantly, proven solutions that deliver and sustain results.

Our Best Ideas Begin With You

The E&C Professional Solutions Group members roll up their sleeves and work with you as a team, blending our collective knowledge and ideas. We listen, absorb your insight about your project challenges and then consider your key objectives as we implement IT services and capabilities that will impact your project.

Our customers tell us there's a "can do" attitude that permeates every aspect of our team. It says we deliver on our promises and that we're tenacious about helping our customers achieve their project-critical goals.

Deliver.
